

CTCore™

Behind the scenes of an Ellenby cash management solution lies a wide array of technologies and software all in support of delivering a comprehensive customer experience. CTCore presents these various tools in a secure, simple, multi-platform environment designed especially for the equipment operator.

CTCore™

Usage Analytics

Charts of equipment typical product usage patterns alongside anomalous behaviors.

Visual Documentation

Step by step instructions on how to perform basic maintenance to keep equipment running optimally.

Settings Configuration

Intuitively reconfigure your equipment with evolving business needs.

Support Tickets

Intuitively reconfigure your equipment with evolving business needs.

User Management

Add and remove equipment users, manage their permission levels, and change access methods.

Real-time Agent Help

Communicate directly with a support agent for guided assistance on resolving any issue without exchanging personal contact information.

Direct Machine Control

Interact directly with your equipment in a richer touchscreen environment surrounded by the added context and awareness of all the other CTCore connected services.

Advanced Reporting

Display reports of equipment usage and performance with integrations to service and support history and transaction data generated from the equipment.
